Work Experience

Front-end developer at [Arman ITMD](#) Dec 2023 – Present

Building web banking applications (mobile bank application , customer services platform, management panels, etc)

- Developed over 40 reusable components, improving code maintainability and consistency across projects.
- Enhanced components performance and functionality speed through optimized technologies, resulting in improved application performance.
- Ensured full responsiveness across desktop, tablet, and mobile platforms, providing a seamless user experience.
- Implemented a monorepo architecture to consolidate all projects, enabling the reuse of components and streamlining the development process.
- Contributed to the design and implementation of all modules for the mobile banking application, collaborating across teams.

Front-end developer at [Zanjan Food](#) Jul 2022 – Dec 2023

Developing the front-end of a local food delivery platform, integrating map functionalities and building front-office and back-office panels.

- Integrated the Leaflet library for interactive maps.
- Delivered a responsive design for desktop and tablet devices.
- Implemented dark mode functionality using pure CSS.
- Refactored and migrated the project to React 18, converting class components to functional components for better maintainability.

Projects

Front-end developer at [Jumpro](#) Oct 2024 – Jan 2025

Implementing a reservation registration website for the gaming platform as well as implementing back office and front office for business management

- Implemented a monorepo architecture to consolidate both front-office and back-office project.
- All menus and accesses have been implemented to allow dynamic control from the management side.
- The website is fully bilingual and directional.

Education

Associate Degree in IT, University of Applied Science and Technology
